REALTIME PARAMETERS

LIVE

FUEL PRESETS

Campfire

Seasoned oak, calm night

Inferno

Full blaze, heavy convec...

Torch

Tight pitch-soaked column

Candle

Laminar, barely breathing

Gas Burner

Premixed methane, blue...

Gale

Wind-raked, embers stre...

COMBUSTION

INTENSITY

1.00x

Energy release — drives brightness, density, light output and ember count.

FLAME HEIGHT

2.10 m

BASE RADIUS

0.46 m

TURBULENCE

0.72

Noise erosion — higher values shred the column into licking tongues.

BURN RATE

1.00x
