BURN INTENSITY**68 %**

Roaring

Intensity

68%

Drives fuel density, emission, plume height and ember output.

PRESETS• **Campfire**

Wide, lazy plume with heavy ember fallout

• **Candle**

Laminar teardrop, almost no turbulence

• **Torch**

Wind-sheared tongue, fast rising sparks

• **Forge**

Gas-rich, blue-based, high thermal shear

Restore defaults

FLAME SHAPE

⬆️ Plume height

55%

🌀 Turbulence

52%

Vortex shedding — low is laminar, high shreds the tip.

🌪️ Wind shear

East 6%

Lateral shear that bends the plume and carries embers downwind.

Gas mixture

Wood
